

Norma Marzano writes....

My home is over 60 years old, and ever since I purchased it almost 14 years ago, I have been remodeling. In December, 2006, I had a dishwasher and new countertop and new tiles installed. It looked very nice, but there were the old cabinets sticking out like a sore thumb!

I learned from my neighbors that my cabinets had been installed in the late 1950's; they were custom made and solid wood cabinets, but they just looked old. (Know what I mean?)

I then set out to price all new cabinets, and was in for a big surprise. Being a divorced woman living on only one income I knew that was out of my price range. Then my cousin told me about Michael. He had refaced her kitchen cabinets, and they were beautiful.

I called Michael's Cabinet Shop and he came to see what he could do with my kitchen. He refaced all the cabinets and made me three new cabinets, which totally changed the look of my kitchen. I have had friends come in and ask if I hit the lottery because my kitchen is gorgeous. I now refer to Michael as "Michael the Magician". His work ethic is something, sadly to say, we don't see much anymore. His finished product is second to none, and I would trust him with any job that needs done.
